PRECISION TOOLS FOR THE LOCKSMITH PROFESSION

FRA-2001
COMPUTER-DRIVEN CODE MACHINE

FULLY AUTOMATIC CODE CUTTING

The FRA-2001 is packed with features you'll use daily. More than just a computerized code machine, here is just a sampling of the machine's capabilities.

THE MACHINE

The FRA-2001 machine is completely controlled through a serial cable by our Genericode software. The machine has no keypad or identification numbers to be confused by when trying to cut a key. Once information is sent, the machine can cut a six-pin key in about 15 seconds. Ball screws and sealed ball bearings are used for smooth motion on both axes. A reversible vise is included with the machine, complete with shoulder and tip stops. The FRA-2001 does not have the capability to make angled cuts for Medeco keys.

## THE SOFTWARE - LOOKUP & CUT A KEY BY MANUFACTURER

In the Manufacturer's section, the Genericode software allows you to cut a key when the bitting is known. You can search alphabetically by manufacturer's name, series or key blank number. Enter your own information for new series, or make a customized chart. All database information is completely editable. Once you have chosen the chart you wish to cut a key for, simply enter the cut numbers and click the "Cut Key" button. If you simply want to generate a random key bitting for rekeying purposes, click the random icon and a bitting will be generated. The software enables you to plunge cut or laser (profile) cut the key. An image of the key to be generated can be viewed with the click of a mouse.
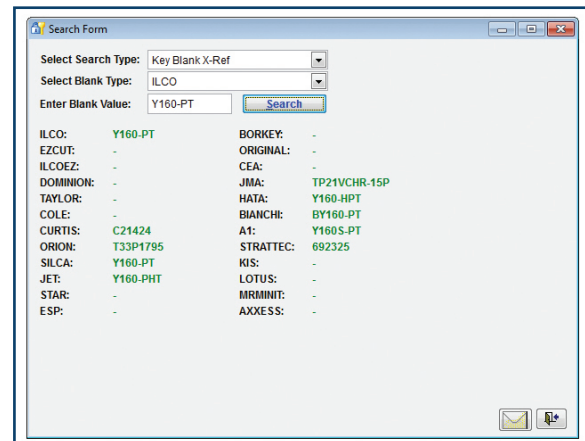

LOOKUP & CUT A KEY BY CODE

The Codes section allows you to look up almost any domestic or imported code you'll run into. You can also search the database by key blank or partial cuts. The program will also show a progression chart for any partial code you enter. Once the code or progression is determined, use the machine to originate your key.

MACHINE HISTORY - LOOKUP KEYS CUT ON THE MACHINE PREVIOUSLY

The software includes a History database, where you can enter your customers' name and other pertinent data to link with a key you have cut on the machine. Easy retrieval in the future is a snap - simply click the mouse and your key is ready to be originated!

APPLICATION SETUP SECTION

All movements of the FRA-2001 Code Machine are completely controllable by the user. If the machine ever needs adjustment, depth and spacing are adjusted from the Machine Section. Feed rate and other machine functions are also adjusted from this section.
